- Motivated, positive & productive workforce

Pay Equity
Women-powered Value Chains
Workforce Participation
Leadership & Governance
Benefits & Prof. Development

Bakery Products
- Payroll adjustment leads to greater women workforce participation
- Moved to larger production facility to ensure capacity to supply staple bread products while much F&B closed

Maternal Healthcare
- Security protocols established for patient and employee wellbeing
- Procurement of PPE and disinfecting activities prioritized
- Considering home services for routine monitoring

EdTech
- Flexible working arrangement for employees
- Services reducing care responsibilities for working mothers while children learning from home
- Offering discount for out-of-school girls and boys during COVID-19 lockdown
## Executing on 2X SMEs COVID Response Strategies

| **Repurpose** | Manila based 2X SME started manufacturing essential goods for business continuity & leveraged logistics for food delivery vs existing personal care distribution |
| **Retool** | Indonesian F&B quickly leveraged team to finalize move to central bakehouse and renovate existing location closed during lockdown |
| **Redeploy** | Kenyan garment manufacturer rapidly converted its production line to supply full PPE kit and reusable face masks for the local market. |
| **Industry Collab.** | Food retailers in Georgia collaborated on employee transportation to ensure supermarkets kept open and stocked with food |
| **Disruptive Opp.** | Manila headquartered cloud-based solutions for business continuity for SMEs; proved even more critical during lockdown |
| **Proactive** | Healthcare providers across Vietnam, Albania & Kosovo rapidly ensured necessary PPE in place and readjusted medical workflow to ensure continued delivery of routine services |
| **Avail of Govt programs** | Food retailer in Serbia leveraging government’s stimulus package to defer payment until 2021, freeing up €1+ MM in cash flow for payroll and suppliers |
DFC’s 2X Initiative

DFC’s 2X Women’s Initiative has mobilized more than $2 billion in capital to businesses and funds owned by, led by, or supporting women.

Gender Lens

• Gender lens/smart investing is one of the core missions of DFC
• DFC has adopted a gender lens to its portfolio to exemplify how it is actively valuing women in its investments
• DFC works across the various business lines (SMEs, structured finance, funds) and with its products (equity, debt, political risk insurance) to ensure gender lens investing is integrated into the holistic investment strategy of the agency
• DFC seeks to understand gender considerations in every project

COVID Response

• DFC knows that women are disproportionately impacted by crises, especially when they seek to access capital
• DFC is working to stabilize its existing portfolio, prioritize new projects that will help developing countries bolster their health services and resilience, and inject desperately needed liquidity
• DFC is working to expedite deals as part of its robust COVID response and is continuing to apply a strong gender lens in these investments.

DFC prioritizes women’s economic empowerment and is doubling down on its effort to empower women.
Thank you
